MASTER THESIS ASSESSMENT

Title: Impact of Financial Crisis on China

Student: Bc. Su Keyu
Supervisor: Ing. Kateřina Kořená, Ph.D.

1. Subject and Objective of the Thesis

   The subject of this thesis is the impact of financial crisis on China. The choice of this subject is very important because of the growing role of the Chinese economy in global world.

   The objective of the thesis is the explanation of the impact of financial crisis on the whole Chinese economy on the basis of the selected financial indicators. This objective is clearly defined and this thesis fulfils the stated objective.

2. Structure of the Thesis

   The master thesis is divided into 5 chapters including introduction and conclusion. The structure of the study is logically organized and is consistent with the thesis assignment.

   The theoretical part of thesis is focused on the description of the definition of the financial crisis and explanation of its functioning. The main types of financial crises are characterized, too. The second part includes clarification of the beginning of the financial crisis in 2007 and its continuation in the following years. The student describes there the background of the subprime crisis including its reasons in the USA.

   The most important part of the thesis is the Chapter 4 Impact of Financial Crisis, in which the author explains the impact of financial crisis on China. He makes it on the principles of the description and evaluation of the development of the selected financial indicators and findings (e.g. GDP growth, inflation rate, unemployment rate, development of stock exchange index, banking industry situation and government interventions). Finally the student clearly summarizes the results of the discovered data and there is also discussion about future development of Chinese economy.

3. Formal Arrangement

   The formal arrangement of the thesis is good; the author generally can use English correctly, there are some minor grammar mistakes with aspects of unclear expression. The references to the bibliography and the pictures and graphs are used properly. The student could have used more annexes for better description of the issues.

4. Question Proposal

   During the thesis defense I recommend to answer the following question:

   - Do you think that China has overcome financial crisis yet?
5. General Comments

The thesis is on a good level. The solved problem is important for the participant's country. The student used appropriate methods and techniques and proved knowledge of the problem, however the thesis should have been longer and it could have been worked out more detailed.

The formal arrangement of the study is good.

On the whole the thesis meets the demanded requirements and from the overall point of view I recommend this thesis for the defense.
