BACHELOR THESIS ASSESSMENT

Title: Assessment of Trading Possibilities with Stocks in Chinese Financial Market

Student: Lanhui Tu
Supervisor: Ing. Kateřina Kořená, Ph.D.

1. Subject and Objective of the Thesis
   The subject of this thesis is the Chinese stock market. The choice of this subject is important and up to date because of its irreplaceable role in the Chinese economy. The topic of the thesis is the assessment of trading possibilities with stocks in China. This objective is defined in the introduction in very general terms.

2. Structure of the Thesis
   The bachelor thesis is divided into 5 chapters including introduction and conclusion. The structure of the study is organized in a good way and it is generally in accordance with the thesis assignment. On the other way it should have been more detailed and more logical.

   The theoretical part of the thesis is focused on the description of the role of the financial market and its principles and functions. Then the author describes the role of the stock exchanges and shortly explains its role in China, too. The second part includes explanation of the structure of the Chinese stock market including the description of the primary and secondary stock market and types of investors.

   The core and the most important part of the thesis is the Chapter 4 Assessment of Trading Possibilities in China in which the author describes the selected stock exchanges and compares them. The attention is paid to the stock indices, too. Finally the student explains very shortly how it is possible to invest in stocks in China. It is necessary to state that this part of the thesis should have been better elaborated. It is also confusing because it mainly consists from short and not detailed comparison of the stock exchanges and therefore the main objective of the thesis it is not clear.

3. Formal Arrangement
   The formal arrangement of the study satisfies the requirements for the elaboration; the author generally can use correct formulations and the expressing is without serious mistakes. But there are smaller formal mistakes in the whole work. The references to the sources are not clear because the authors cited in the theoretical part are not part of the bibliography. Also the electronic sources are not complete. Generally the sources should have been broader.

4. Question Proposal
   During the thesis defense I recommend to answer the following question:

   - Will you explain the possibilities of foreign investors in this market?
5. General Comments

The thesis is understandable and in total meets the demanded requirements. The student proved knowledge of this subject, but the thesis should have better elaborated and should have been more detailed. The structure of the thesis should have been better worked out.

The formal arrangement of the study is good.

On the whole it is possible to state that the objective of submitted thesis was for the most part fulfilled. Therefore despite the above mentioned objections this thesis can be recommended for the defense.
